WALL-MOUNTED HAIR DRYERS WITH FLEXIBLE HOSE

Range and product specifications

- 2 models - with and without razor socket.
- Automatic hose hair dryer for wall mounting.
- Flexible spiral PVC hose.
- Front cover in self-extinguishing V0 ABS resin.
- Hose extends from 500 to 1600 mm.
- PLUS version equipped with razor sockets for 230 V / 50 Hz and 110 V / 60 Hz power, with overload protection.
- The heating element is protected by two safety devices (automatic reset thermal cutout and thermal fuse).

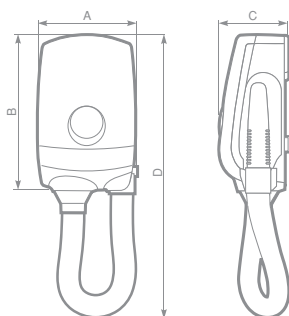

KEY FEATURES

- Washable dust filter: protects internal parts and guarantees reliable, low maintenance operation.
- Its modern, compact design make it ideal for use in hotels and the home.
- Turned on simply by unhooking the blower and pulling it towards you, and turned off when hooked up.
- Integrated automatic stop: the unit switches off when the blower is replaced, or after around 20 minutes of continuous operation.
- The blower's ergonomic design ensures a sure grip even with wet hands. Its internal core prevents overheating, which can be uncomfortable when used for a long time.
